PROFESSIONAL SUMMARY

Detail-oriented BSc (Hons) Computer Science graduate specializing in data analytics, with hands-on project experience across SQL, Power BI, Tableau, Excel, and Python. Skilled at turning raw, messy datasets into clean, structured data models and translating them into interactive dashboards and clear, business-focused insights. Comfortable working independently across the full analytics workflow — from data collection and cleaning through to KPI design, visualization, and reporting. Seeking an entry-level Data Analyst role to apply strong analytical thinking and technical skills to real business problems.

CORE SKILLS

- **Data Analysis:** Data Cleaning · Data Validation · Data Transformation · Exploratory Data Analysis (EDA) · KPI Analysis · Trend Analysis · Business Reporting · Data Storytelling
- **SQL & Databases:** MySQL · SELECT/WHERE/GROUP BY/ORDER BY · Joins · Subqueries · CTEs · Window Functions · Aggregations
- **Power BI:** Power Query · DAX · Data Modelling · Calculated Measures · Interactive Dashboards · Business Intelligence
- **Excel:** Pivot Tables · XLOOKUP/VLOOKUP · SUMIF/COUNTIF · IF · Dashboard Development
- **Python:** Pandas · NumPy · Matplotlib · Seaborn · Data Cleaning · EDA · Data Visualization
- **Tableau:** Calculated Fields · Filters · Interactive Dashboards
- **Tools:** GitHub · VS Code · Google Collab · Trello

PROJECT EXPERIENCE

Online Retail Sales Analysis

Power BI · Power Query · DAX · Excel · Data Modelling

- Built a multi-page Power BI dashboard covering sales revenue, product performance, customer trends, and year-over-year growth, giving stakeholders a single source of truth instead of scattered spreadsheets.
- Cleaned and transformed raw transactional sales data in Power Query, resolving inconsistent formatting and missing values to produce an analysis-ready dataset.
- Designed a structured data model with defined relationships across sales, product, and customer tables to support fast, reliable cross-dimensional analysis.
- Wrote custom DAX measures to track revenue, growth rate, and customer performance KPIs, surfacing trends that would be difficult to spot in raw data.
- Delivered interactive charts, KPI cards, and slicers so non-technical stakeholders could self-serve answers to common business questions.

Data Professional Survey Analysis

Power BI · Power Query · DAX · Excel

- Analyzed responses from 630 data professionals to uncover trends in salary, programming language use, job satisfaction, and work-life balance.
- Cleaned and standardized inconsistent survey data in Power Query, improving reliability of downstream comparisons across roles and regions.
- Built an interactive Power BI dashboard with KPIs, filters, and comparison charts to let users explore results by job role, tools used, and experience level.
- Authored DAX measures to benchmark salary and satisfaction metrics across job roles and technology stacks, highlighting the highest-paying skill combinations.
- Presented findings as a data story, translating statistical patterns into plain-language takeaways for a non-technical audience.

Airbnb Data Analytics Dashboard

Tableau · Excel · Data Visualization

- Built an interactive Tableau dashboard analyzing Airbnb pricing, bedroom category, property type, and geographic trends across listings.
- Identified pricing differences across bedroom categories and ZIP codes, highlighting which property characteristics were associated with premium pricing.
- Created calculated fields and filters enabling users to drill into property-level and geographic trends without needing raw data access.
- Packaged findings into a business-reporting-ready dashboard designed for quick, decision-focused consumption.

Earthquake Data Analysis

Python · Pandas · NumPy · Matplotlib · USGS Data

- Built an end-to-end workflow to collect, clean, validate, transform, and analyze real-world USGS earthquake data.
- Used Pandas and NumPy to handle data validation and exploratory analysis across magnitude, location, and frequency variables.
- Analyzed geographic and temporal patterns in seismic activity to identify high-frequency and high-magnitude regions.
- Produced Matplotlib visualizations to communicate distribution patterns and trends clearly to a non-technical audience.

CERTIFICATIONS & TRAINING

- **Deloitte Australia — Data Analytics Job Simulation** — Completed applied tasks in data analysis, visualization, business insight generation, and reporting.
- **Data Analyst Bootcamp — Alex the Analyst (2026)** Trained across SQL, Excel, Python, Power BI, Tableau, and GitHub; practiced SQL querying, data cleaning, KPI analysis, dashboard development, and analytical problem-solving.

EDUCATION

BSc (Hons) Computer Science

Herald College Kathmandu — affiliated with University of Wolverhampton, UK

Result: 61.67% Second Class, First Division

Higher Secondary Education (+2)

Reliance International Academy — GPA: 3.39

Secondary Education Examination (SEE)

Winsome English Boarding School — GPA: 3.80

ADDITIONAL SKILLS

Analytical Thinking · Problem Solving · Attention to Detail · Communication · Stakeholder Communication · Team Collaboration · Report Writing · Data Storytelling
